## **PART I: GENERAL INSTRUCTIONS**

### 1. Structure and conventions

#### 1.1. Structure

1. Overall, the framework covers six topics:
  - (a) capital adequacy, an overview of regulatory capital; total risk exposure amount; prudent valuation; NPE loss coverage;
  - (b) group solvency, an overview of the fulfilment of the solvency requirements by all individual entities included in the scope of consolidation of the reporting entity;
  - (c) credit risk (including counterparty, dilution and settlement risks);
  - (d) market risk (including position risk in trading book, foreign exchange risk, commodities risk and CVA risk);
  - (e) operational risk;
  - (f) general governments exposures
2. For each template legal references are provided. Further detailed information regarding more general aspects of the reporting of each block of templates, instructions concerning specific positions as well as validation rules are included in this part of this Implementing Regulation.
3. Institutions shall report only those templates that are relevant depending on the approach used for determining own funds requirements.

#### 1.2. Numbering convention

4. The document follows the labelling convention set in points 5 to 8, when referring to the columns, rows and cells of the templates. Those numerical codes are extensively used in the validation rules.
5. The following general notation is followed in the instructions: {Template; Row; Column}.
6. In the case of validations inside a template, in which only data points of that template are used, notations do not refer to a template: {Row; Column}.
7. In the case of templates with only one column, only rows are referred to. {Template; Row}
8. An asterisk sign is used to express that the validation is done for the rows or columns specified before.

### 1.3. Sign convention

9. Any amount that increases the own funds or the capital requirements shall be reported as a positive figure. On the contrary, any amount that reduces the total own funds or the capital requirements shall be reported as a negative figure. Where there is a negative sign (-) preceding the label of an item, no positive figure is expected to be reported for that item.

### 1.4. Abbreviations

## **PART II: TEMPLATE RELATED INSTRUCTIONS**

### 1. Capital Adequacy Overview ('CA')

#### 1.1. General remarks

11. The CA templates contain information about Pillar 1 numerators (own funds, Tier 1, Common Equity Tier 1), denominator (own funds requirements), and the application of [Regulation \(EU\) No 575/2013 CRR](#) and [Directive 2013/36/EU CRD](#) transitional provisions and is structured in five templates:

Formatted: Font color: Auto

(a) Template CA1 contains the amount of own funds of the institutions, disaggregated in the items needed to get to that amount. The amount of own funds obtained includes the aggregate effect of the application of [Regulation \(EU\) No 575/2013 CRR](#) and [Directive 2013/36/EU CRD](#) transitional provisions per type of capital;

Formatted: Font color: Auto

Formatted: Font color: Auto

(b) Template CA2 summarises the total risk exposures amounts as defined in Article 92(3) [of Regulation \(EU\) No 575/2013 CRR](#);

Formatted: Font color: Auto

(c) Template CA3 contains the ratios for which [Regulation \(EU\) No 575/2013 CRR](#) states a minimum level, Pillar 2 ratios and some other related data;

Formatted: Font color: Auto

(d) Template CA4 contains memorandums items needed, among others, for calculating items in CA1 as well as information with regard to [Directive 2013/36/EU CRD](#) capital buffers;

(e) Template CA5 contains the data needed for calculating the effect of the application of [Regulation \(EU\) No 575/2013 CRR](#) transitional provisions in own funds. CA5 will cease to exist once those transitional provisions expire.

Formatted: Font color: Auto

12. The templates shall be used by all reporting entities, irrespective of the accounting standards followed, although some items in the numerator are specific for entities applying IAS/IFRS-type valuation rules. Generally, the information in the denominator is linked to the final results reported in the correspondent templates for the calculation of the total risk exposure amount.

13. The total own funds consist of different types of capital: Tier 1 capital (T1), which is the sum of Common Equity Tier 1 capital (CET1) and Additional Tier 1 capital (AT1) as well as Tier 2 capital (T2).

14. The application of [Regulation \(EU\) No 575/2013 CRR](#) and [Directive 2013/36/EU CRD](#) transitional provisions is treated as follows in CA templates:

Formatted: Font color: Auto

(a) The items in CA1 are generally gross of transitional adjustments. That means that figures in CA1 items are calculated in accordance with the final provisions (i.e. as if there were no transitional provisions), with the exception of items summarizing the effect of those transitional provisions. For each type of capital (i.e. CET1; AT1 and T2), there are three different items in which all the adjustments due to those transitional provisions are included.

(b) Transitional provisions may also affect the AT1 and the T2 shortfall (i.e. AT1 or T2 the excess of deduction, regulated in ~~point (j) of Article 36(1), point (j) and point (e) of Article 56 of Regulation (EU) No 575/2013~~~~CRR~~, ~~point (e)~~ respectively), and thus the items containing those shortfalls may indirectly reflect the effect of those transitional provisions.

Formatted: Font color: Auto

(c) Template CA5 is exclusively used for reporting the effect due to the application of ~~the Regulation (EU) No 575/2013~~ ~~CRR~~ transitional provisions.

Formatted: Font color: Auto

15. The treatment of Pillar II requirements can be different within the Union (Article 104a(1) ~~of Directive 2013/36/EU~~~~CRD~~ has to be transposed into national regulation). Only the impact of Pillar II requirements on the solvency ratio or the target ratio shall be included in the solvency reporting required under ~~Regulation (EU) No 575/2013~~~~CRR~~.

Formatted: Font color: Auto

- a) The templates CA1, CA2 or CA5 only contain data on Pillar I issues.
- b) The template CA3 contains the impact of additional Pillar II-requirements on the solvency ratio on an aggregated basis. It mainly focuses on the target ratios themselves. There is no further link to the templates CA1, CA2 or CA5.
- c) The template CA4 contains one cell regarding additional own funds requirements relating to Pillar II. That cell has no link via validation rules to the capital ratios of the CA3 template and reflects Article 104a(1) ~~of Directive 2013/36/EU~~~~CRD~~ which explicitly mentions additional own funds requirements as one possibility for Pillar II decisions.

## 1.6 TRANSITIONAL PROVISIONS and GRANDFATHERED INSTRUMENTS: INSTRUMENTS NOT CONSTITUTING STATE AID (CA5)

### 1.6.1 General remarks

16. CA5 summarises the calculation of own funds elements and deductions subject to the transitional provisions laid down in Articles 465 to 491, 494a and 494b [of Regulation \(EU\) No 575/2013](#) ~~CRR~~.

Formatted: Font color: Auto

17. CA5 is structured as follows:

(a) Template CA5.1 summarises the total adjustments which need to be made to the different components of own funds (reported in CA1 in accordance with the final provisions) as a consequence of the application of the transitional provisions. The elements of this template are presented as “adjustments” to the different capital components in CA1, in order to reflect in own funds components the effects of the transitional provisions.

(b) Template 5.2 provides further details on the calculation of those grandfathered instruments which do not constitute state aid.

18. Institutions shall report in the first four columns the adjustments to Common Equity Tier 1 capital, Additional Tier 1 capital and Tier 2 capital as well as the amount to be treated as risk weighted assets. Institutions are also required to report the applicable percentage in column 0050 and the eligible amount without the recognition of transitional provisions in column 0060.

Field Code Changed

19. Institutions shall only report elements in CA5 during the period where transitional provisions laid down in Part Ten, [Regulation \(EU\) No 575/2013](#) ~~CRR~~ apply.

Formatted: Font color: Auto

20. Some of the transitional provisions require a deduction from Tier 1. If this is the case the residual amount of a deduction or deductions is applied to Tier 1 and there is insufficient AT1 to absorb this amount then the excess shall be deducted from CET1.

### 1.6.2. C 05.01 - TRANSITIONAL PROVISIONS (CA5.1)

21. Institutions shall report in CA5.1 template the transitional provisions to own funds components as laid down in Articles 465 to 491, 494a and 494b [of Regulation \(EU\) No 575/2013](#) ~~CRR~~, compared to applying the final provisions laid down in ~~Title II of Part Two, Title II of that Regulation (EU) No 575/2013~~ ~~CRR~~.

Formatted: Font color: Auto

Formatted: Font color: Auto

22. Institutions shall report in rows 0060 to 0065 information about the transitional provisions of grandfathered instruments. The figures to be reported in row 0060 of CA5.1 reflect the transitional provisions included in the [of Regulation \(EU\) No 575/2013](#) ~~CRR~~ in the version applicable until 26 June 2019 and can be derived from the respective sections of CA5.2. Rows 0061 to 0065 capture the effect of the transitional provisions of Articles 494a and 494b [of Regulation \(EU\) No 575/2013](#) ~~CRR~~.

Formatted: Font color: Auto

Formatted: Font color: Auto

23. Institutions shall report in rows 0070 to 0092 information about the transitional provisions of minority interests and additional Tier 1 and Tier 2 instruments issued by subsidiaries (in accordance with Articles 479 and 480 [of Regulation \(EU\) No 575/2013 CRR](#)).
24. In rows 0100 onwards institutions shall report information about the effect of the transitional provisions regarding unrealised gains and losses, deductions, additional filters and deductions and IFRS 9.
25. There might be cases where the transitional deductions of CET1, AT1 or T2 capital exceed the CET1, AT1 or T2 capital of an institution. That effect – if it results from transitional provisions – shall be shown in the CA1 template using the respective cells. As a consequence, the adjustments in the columns of the CA5 template shall not include any spill-over effects in the case of insufficient capital available.

## 2. GROUP SOLVENCY: INFORMATION ON AFFILIATES (GS)

### 2.1. General remarks

27. Templates C 06.01 and C 06.02 shall be reported if own funds requirements are calculated on a consolidated basis. Template C 06.02 consists of four parts in order to gather different information on all individual entities (including the reporting institution) included in the scope of consolidation.

- (a) Entities within the scope of consolidation;
- (b) Detailed group solvency information;
- (c) Information on the contribution of individual entities to group solvency;
- (d) Information on capital buffers;

28. Institutions that obtained a waiver in accordance with Article 7 [of Regulation \(EU\) No 575/2013 CRR](#) shall only report the columns 0010 to 0060 and 0250 to 0400.

Formatted: Font color: Auto

29. The figures reported take into account all applicable transitional provisions of [Regulation \(EU\) No 575/2013 CRR](#) which are applicable at the respective reporting date.

Formatted: Font color: Auto

## 2.2. Detailed group solvency information

30. The second part of template C 06.02 (detailed group solvency information) in columns 0070 to 0210 is designed to gather information on credit and other regulated financial institutions which are effectively subject to particular solvency requirements on individual basis. It provides, for each of those entities within the scope of the reporting, the own funds requirements for each risk category and the own funds for solvency purposes.

31. In the case of proportional consolidation of participations, the figures related to own funds requirements and own funds shall reflect the respective proportional amounts.

## 2.3. Information on the contributions of individual entities to group solvency

32. The objective of the third part of template C 06.02 and template C 06.01 (information on the contributions of all entities within [Regulation \(EU\) No 575/2013 CRR](#) scope of consolidation to group solvency), including those that are not subject to particular solvency requirements on an individual basis, in columns 0250 to 0400, is to identify which entities within the group generate the risks and raise own funds from the market, based on data that are readily available or can easily be reprocessed, without having to reconstruct the capital ratio on a solo or sub-consolidated basis. At the entity level, both risk and own fund figures are contributions to the group figures and not elements of a solvency ratio on a solo basis and as such must not be compared to each other.

Formatted: Font color: Auto

33. The third part also includes the amounts of minority interests, qualifying AT1, and qualifying T2 eligible in the consolidated own funds.

34. As this third part of the template refers to “contributions”, the figures to be reported herein shall defer, when applicable, from the figures reported in the columns referring to detailed group solvency information.

35. The principle is to delete the cross-exposures within the same groups in a homogeneous way both in terms of risks or own funds, in order to cover the amounts reported in the group’s consolidated CA template by adding the amounts reported for each entity in “Group Solvency” template. A direct link to the CA template is not possible where the 1 % threshold is not exceeded.

36. The institutions shall define the most appropriate breakdown method between the entities to take into account the possible diversification effects for market risk and operational risk.

37. It is possible for one consolidated group to be included within another consolidated group. That means that the entities within a subgroup shall be reported entity-by-entity in the GS of the entire group, even if the sub-group itself is subject to reporting requirements. A subgroup that is subject to reporting requirements

shall also report the GS template on an entity-by-entity basis, although those details are included in the GS template of a higher consolidated group.

38. An institution shall report data of the contribution of an entity when its contribution to the total risk exposure amount exceeds 1 % of the total risk exposure amount of the group or when its contribution to the total own funds exceeds 1% of the total own funds of the group. That threshold does not apply in the case of subsidiaries or subgroups that provide own funds (in the form of minority interests or qualifying AT1 or T2 instruments included in own funds) to the group.

0010-0060	<b><u>ENTITIES WITHIN SCOPE OF CONSOLIDATION</u></b> This template is designed to gather information on all entities on an entity-by-entity-basis within the scope of consolidation in accordance with <a href="#">Chapter 2 of Title II of Part One, Title II, Chapter 2 of Regulation (EU) No 575/2013</a> <del>CRR</del> .
0011	<b><u>NAME</u></b> Name of the entity within the scope of consolidation.
0021	<b><u>CODE</u></b> The code as part of a row identifier must be unique for each reported entity. For institutions and insurance undertakings the code shall be the LEI code. For other entities the code shall be the LEI code, or if not available, a national code. The code shall be unique and used consistently across the templates and across time. The code shall always have a value.

### 3. Credit Risk Templates

#### 3.1. General remarks

39. There are different sets of templates for the Standardised approach and the IRB approach for credit risk. Additionally, separate templates for the geographical breakdown of positions subject to credit risk shall be reported if the relevant threshold set out in Article 5(5) of this Implementing Regulation is exceeded.

##### 3.1.1. Reporting of CRM techniques with substitution effect

40. Exposures to obligors (immediate counterparties) and guarantors which are assigned to the same exposure class shall be reported as an inflow as well as an outflow to the same exposure class.

41. The exposure type shall not change because of unfunded credit protection.

42. If an exposure is secured by an unfunded credit protection, the secured part shall be assigned as an outflow e.g. in the exposure class of the obligor and as an inflow in the exposure class of the guarantor. However, the type of the exposure shall not change due to the change of the exposure class.

43. The substitution effect in the COREP reporting framework shall reflect the risk weighting treatment effectively applicable to the covered part of the exposure. As such, the covered part of the exposure shall be risk weighted in accordance with the Standardised approach and shall be reported in the CR SA template.

##### 3.1.2. Reporting of Counterparty Credit Risk

44. Exposures stemming from Counterparty Credit Risk positions shall be reported in templates CR SA or CR IRB independent from whether they are Banking Book items or Trading Book items.

3.2. C 07.00 - Credit and counterparty credit risks and free deliveries: Standardised approach to Capital Requirements (CR SA)

3.2.1. General remarks

45. The CR SA templates provide the necessary information on the calculation of own funds requirements for credit risk in accordance with the Standardised approach. In particular, they provide detailed information on:

- a) the distribution of the exposure values according to the different, exposure types, risk weights and exposure classes ;
- b) the amount and type of credit risk mitigation techniques used for mitigating the risks.

3.2.2. Scope of the CR SA template

46. In accordance with Article 112 ~~of Regulation (EU) No 575/2013 CRR~~ each SA exposure shall be assigned to one of the 16 SA exposure classes to calculate the own funds requirements.

Formatted: Font color: Auto

47. The information in CR SA is required for the total exposure classes and individually for each of the exposure classes under the Standardised approach. The total figures as well as the information of each exposure class are reported in a separate dimension.

48. However the following positions are not within the scope of CR SA:

(a) Exposures assigned to exposure class 'items representing securitisation positions' as referred to in ~~point (m) of~~ Article 112, ~~point (m) of Regulation (EU) No 575/2013 CRR~~, which shall be reported in the CR SEC templates.

Formatted: Font color: Auto

(b) Exposures deducted from own funds.

49. The scope of the CR SA template shall cover the following own funds requirements:

(a) Credit risk in accordance with Chapter 2 (Standardised approach) of ~~Title II of Part Three, Title II of Regulation (EU) No 575/2013 CRR~~ in the banking book, among which Counterparty credit risk in accordance with Chapters 4 and 6 (Counterparty credit risk) of ~~Title II of Part Three, Title II~~ CRR in the banking book;

Formatted: Font color: Auto

(b) Counterparty credit risk in accordance with Chapters 4 and 6 (Counterparty credit risk) of ~~Title II of Part Three, Title II of Regulation (EU) No 575/2013 CRR~~ in the trading book;

Formatted: Font color: Auto

(c) Settlement risk arising from free deliveries in accordance with Article 379 ~~of Regulation (EU) No 575/2013 CRR~~ in respect of all the business activities.

Formatted: Font color: Auto

50. The template shall include all exposures for which the own funds requirements are calculated in accordance with ~~Chapter 2 of Title II of Part Three, Title II,~~

~~Chapter 2 of Regulation (EU) No 575/2013 CRR~~ in conjunction with ~~Chapters 4 and 6 of Title II of Part Three, Title II, Chapters 4 and 6 of Regulation (EU) No 575/2013 CRR~~. Institutions that apply Article 94(1) ~~of Regulation (EU) No 575/2013 CRR~~ also need to report their trading book positions referred to in ~~point (b) of Article 92(3), point (b) of that Regulation CRR~~ in this template when they apply ~~Chapter 2 of Title II of Part Three, Title II, Chapter 2 CRR of that Regulation~~ to calculate the own funds requirements thereof (~~Chapters 2 and 6 of Title II of Part Three, Title II, Chapters 2 and 6 and Title V of Part Three, Title V CRR of that Regulation~~). Therefore the template shall not only provide detailed information on the type of the exposure (e.g. on balance sheet/ off balance sheet items), but also information on the allocation of risk weights within the respective exposure class.

51. In addition, CR SA includes memorandum items in rows 0290 to 0320 to collect further information about exposures secured by mortgages on immovable property and exposures in default.

Field Code Changed

52. Those memorandum items shall only be reported for the following exposure classes:

(a) Central governments or central banks (~~point (a) of Article 112, point (a) of Regulation (EU) No 575/2013 of Regulation (EU) No 575/2013 CRR~~);

Formatted: Font color: Auto

(b) Regional governments or local authorities (~~point (b) of Article 112, point (b) of Regulation (EU) No 575/2013 CRR~~);

Formatted: Font color: Auto

(c) Public sector entities (~~point (c) of Article 112, point (c) of Regulation (EU) No 575/2013 CRR~~);

Formatted: Font color: Auto

(d) Institutions (~~point (f) of Article 112, point (f) of Regulation (EU) No 575/2013 CRR~~);

Formatted: Font color: Auto

(e) Corporates (~~point (g) of Article 112, point (g) of Regulation (EU) No 575/2013 CRR~~);

Formatted: Font color: Auto

(f) Retail (~~point (h) of Article 112, point (h) of Regulation (EU) No 575/2013 CRR~~).

Formatted: Font color: Auto

53. The reporting of the memorandum items shall affect neither the calculation of the risk weighted exposure amounts of the exposure classes referred to in ~~points (a) to (e) and (f) to (h) of Article 112, points (a) to (c) and (f) to (h) of Regulation (EU) No 575/2013 CRR~~ nor of the exposure classes referred to in ~~points (i) and (j) of Article 112, points (i) and (j) of that Regulation CRR~~ reported in template CR SA.

Formatted: Font color: Auto

Formatted: Font color: Auto

54. The memorandum rows provide additional information about the obligor structure of the exposure classes 'in default' or 'secured by immovable property'. Exposures shall be reported in these rows where the obligors would have been reported in the exposure classes 'Central governments or central banks', 'Regional governments or local authorities', 'Public sector entities', 'Institutions', 'Corporates' and 'Retail' of CR SA, if those exposures were not assigned to the exposure

classes 'in default' or 'secured by immovable property'. The figures reported, however, are the same as used to calculate the risk weighted exposure amounts in the exposure classes 'in default' or 'secured by immovable property'.

55. E.g. if an exposure, the risk exposure amounts of which are calculated in accordance with Article 127 [of Regulation \(EU\) No 575/2013](#)~~CRR~~ and the value adjustments are less than 20%, then that information shall be reported in CR SA, row 0320 in the total and in the exposure class 'in default'. If this exposure, before it defaulted, was an exposure to an institution, then that information shall also be reported in row 0320 of exposure class 'institutions'.

Formatted: Font color: Auto

### 3.2.3. Assignment of exposures to exposure classes under the Standardised approach

56. In order to ensure a consistent categorisation of exposures into the different exposure classes referred to in Article 112 [of Regulation \(EU\) No 575/2013](#)~~CRR~~ the following sequential approach shall be applied:

Formatted: Font color: Auto

- (a) In a first step, the Original exposure pre-conversion factors shall be classified into the corresponding (original) exposure class referred to in Article 112 [of Regulation \(EU\) No 575/2013](#)~~CRR~~, without prejudice to the specific treatment (risk weight) that each specific exposure shall receive within the assigned exposure class.

Formatted: Font color: Auto

- (b) In a second step the exposures may be redistributed to other exposure classes due to the application of credit risk mitigation (CRM) techniques with substitution effects on the exposure (e.g. guarantees, credit derivatives, financial collateral simple method) via inflows and outflows.

57. The following criteria shall apply to for the classification of the Original exposure pre-conversion factors into the different exposure classes (first step) without prejudice to the subsequent redistribution caused by the use of CRM techniques with substitution effects on the exposure or to the treatment (risk weight) that each specific exposure shall receive within the assigned exposure class.

58. For the purpose of classifying the original exposure pre-conversion factor in the first step, the CRM techniques associated to the exposure shall not be considered (note that they shall be considered explicitly in the second phase) unless a protection effect is intrinsically part of the definition of an exposure class as it is the case in the exposure class referred to in ~~point (i) of~~ Article 112, [point \(i\) of Regulation \(EU\) No 575/2013](#)~~CRR~~ (exposures secured by mortgages on immovable property).

Formatted: Font color: Auto

59. Article 112 [of Regulation \(EU\) No 575/2013](#)~~CRR~~ does not provide criteria for disjoining the exposure classes. This might imply that one exposure could potentially be classified in different exposure classes if no prioritisation in the assessment criteria for the classification is provided. The most obvious case arises between exposures to institutions and corporate with a short-term credit assessment (~~point (n) of~~ Article 112, [point \(n\) of Regulation \(EU\) No 575/2013](#)~~CRR~~) and exposures to institutions (~~point (f) of~~ Article 112, [point \(f\) of Regulation \(EU\) No 575/2013](#)~~CRR~~)/ exposures to corporates (~~point (g) of~~ Article 112, [point \(g\) of](#)

Formatted: Font color: Auto

Formatted: Font color: Auto

Formatted: Font color: Auto

Formatted: Font color: Auto

[Regulation \(EU\) No 575/2013](#)~~CRR~~). In that case, it is clear that there is an implicit prioritisation in ~~that Regulation CRR~~ since it shall be assessed first if a certain exposure is fit for being assigned to Short-term exposures to institutions and corporates and only afterwards assessed if it fits for being assigned to exposures to institutions or exposures to corporates. Otherwise it is obvious that the exposure class referred to in ~~point (n) of Article 112, point (n) of Regulation (EU) No 575/2013~~~~CRR~~ shall never be assigned an exposure. The example provided is one of the most obvious examples but is not the only one. It is worth noting that the criteria used for establishing the exposure classes under the Standardised approach are different (institutional categorisation, term of the exposure, past due status, etc.) which is the underlying reason for non-disjoint groupings.

Formatted: Font color: Auto

Formatted: Font color: Auto

60. For a homogeneous and comparable reporting it is necessary to specify prioritisation assessment criteria for the assignment of the Original exposure pre-conversion factor by exposure classes, without prejudice to the specific treatment (risk weight) that each specific exposure shall receive within the assigned exposure class. The prioritisation criteria presented below, using a decision tree scheme, are based on the assessment of the conditions explicitly laid down in [Regulation \(EU\) No 575/2013](#)~~CRR~~ for an exposure to fit in a certain exposure class and, if that is the case, on any decision on the part of the reporting institutions or the supervisor on the applicability of certain exposure classes. Therefore, the outcome of the exposure assignment process for reporting purposes shall be in line with [Regulation \(EU\) No 575/2013](#)~~CRR~~ provisions. That does not prohibit institutions from applying other internal assignment procedures that may also be consistent with all relevant [Regulation \(EU\) No 575/2013](#)~~CRR~~ provisions and its interpretations issued by the appropriate fora.

Formatted: Font color: Auto

Formatted: Font color: Auto

Formatted: Font color: Auto

61. An exposure class shall be given priority to others in the assessment ranking in the decision tree (i.e. it shall be first assessed if an exposure can be assigned to an exposure class, without prejudice to the outcome of that assessment) if otherwise no exposures would potentially be assigned to it. That will be the case where in the absence of prioritisation criteria one exposure class is a subset of others. Therefore, the criteria graphically depicted in the following decision tree would work on a sequential process.

62. With this background the assessment ranking in the decision tree mentioned below shall follow the following order:

1. Securitisation positions;
2. Items associated with particular high risk;
3. Equity exposures
4. Exposures in default;
5. Exposures in the form of units or shares in collective investment undertakings ('CIU')/ Exposures in the form of covered bonds (disjoint exposure classes);
6. Exposures secured by mortgages on immovable property;
7. Other items;
8. Exposures to institutions and corporates with a short-term credit assessment;

9. All other exposure classes (disjoint exposure classes) which include Exposures to central governments or central banks; Exposures to regional governments or local authorities; Exposures to public sector entities; Exposures to multilateral development banks; Exposures to international organisations; Exposures to institutions; Exposures to corporate and Retail exposures.

63. In the case of exposures in the form of units or shares in collective investment undertakings and where the look through approach or the mandate-based approach (~~points (1) and (2) of Article 132a, points (1) and (2) of Regulation (EU) No 575/2013~~~~CRR~~) is used, the underlying individual (in the case of the look through approach) and individual group of (in the case of the mandate-based approach) exposures shall be considered and classified into their corresponding risk weight line according to their treatment. However, all the individual exposures shall be classified within the exposure class of Exposures in the form of units or shares in collective investment undertakings ('CIU').

Formatted: Font color: Auto

64. "nth" to default credit derivatives, as specified in Article 134(6) ~~of Regulation (EU) No 575/2013~~~~CRR~~ that are rated shall be directly classified as securitisation positions. If they are not rated, they shall be considered in the "Other items" exposure class. In that latter case, the nominal amount of the contract shall be reported as the Original exposure pre-conversion factors in the line for "Other risk weights" (the risk weight used shall be that specified by the sum indicated under Article 134(6) ~~of Regulation (EU) No 575/2013~~~~CRR~~).

Formatted: Font color: Auto

65. In a second step, as a consequence of credit risk mitigation techniques with substitution effects, exposures shall be reallocated to the exposure class of the protection provider.

3.2.4. Clarifications on the scope of some specific exposure classes referred to in Article 112 of Regulation (EU) No 575/2013~~CRR~~

Formatted: Font color: Auto

3.2.4.1. Exposure Class “Institutions”

66. Intra-group exposures referred to in ~~paragraphs 6 and 7 of Article 113, paragraphs 6 and 7 of Regulation (EU) No 575/2013~~CRR shall be reported as follows:

Formatted: Font color: Auto

67. Exposures which fulfil the requirements of Article 113(7) of Regulation (EU) No 575/2013~~CRR~~ shall be reported in the respective exposure classes where they would be reported if they were not intra-group exposures.

Formatted: Font color: Auto

68. According to ~~paragraphs 6 and 7 of Article 113, paragraphs 6 and 7 of Regulation (EU) No 575/2013~~CRR an institution may, subject to the prior approval of the competent authorities, decide not to apply the requirements of paragraph 1 of that Article to the exposures of that institution to a counterparty which is its parent undertaking, its subsidiary, a subsidiary of its parent undertaking or an undertaking linked by a relationship within the meaning of Article 12(1) of Directive 83/349/EEC. That means that intra-group counterparties are not necessarily institutions but also undertakings which are assigned to other exposure classes, e.g. ancillary services undertakings or undertakings within the meaning of Article 12(1) of Council Directive 83/349/EEC<sup>8</sup>. Therefore intra-group exposures shall be reported in the corresponding exposure class.

3.2.4.2. Exposure Class “Covered Bonds”

69. SA exposures shall be assigned to the exposure class “covered bonds” as follows:

70. Bonds referred to in Article 52(4) of Directive 2009/65/EC of the European Parliament and of the Council<sup>9</sup> shall fulfil the requirements of ~~paragraphs 1 and 2 of Article 129, paragraphs 1 and 2 of Regulation (EU) No 575/2013~~CRR to be classified in the exposure class “Covered Bonds”. The fulfilment of those requirements has to be checked in each case. Nevertheless, bonds referred to in Article 52(4) of Directive 2009/65/EC and issued before 31 December 2007 shall also be assigned to the exposure class “Covered Bonds” pursuant to Article 129(6) of Regulation (EU) No 575/2013~~CRR~~.

### 3.3. Credit and counterparty credit risks and free deliveries: IRB approach to Own funds Requirements (CR IRB)

#### 3.3.1. Scope of the CR IRB template

72. The scope of the CR IRB template covers:

- i. Credit risk in the banking book, among which:
  - Counterparty credit risk in the banking book;
  - Dilution risk for purchased receivables;
- ii. Counterparty credit risk in the trading book;
- iii. Free deliveries resulting from all business activities.

73. The scope of the template refers to the exposures for which the risk weighted exposure amounts are calculated in accordance with [Articles 151 to 157 of Chapter 3 of Title II of Part Three, Title II, Chapter 3, Articles 151 to 157 of Regulation \(EU\) No 575/2013](#)~~CRR~~ (IRB approach).

Formatted: Font color: Auto

74. The CR IRB template does not cover the following data:

- i. Equity exposures, which are reported in the CR EQU IRB template;
- ii. Securitisation positions, which are reported in the CR SEC and/or CR SEC Details templates;
- iii. “Other non credit-obligation assets”, as referred to in [point \(g\) of Article 147\(2\), point \(g\) of Regulation \(EU\) No 575/2013](#)~~CRR~~. The risk weight for this exposure class has to be set at 100 % at any time except for cash in hand, equivalent cash items and exposures that are residual values of leased assets, in accordance with Article 156 [of Regulation \(EU\) No 575/2013](#)~~CRR~~. The risk weighted exposure amounts for this exposure class shall be reported directly in the CA-Template;
- iv. Credit valuation adjustment risk, which is reported on the CVA Risk template;

Formatted: Font color: Auto

Formatted: Font color: Auto

The CR IRB template does not require a geographical breakdown of IRB exposures by residence of the counterparty. This breakdown shall be reported in the template CR GB.

Items i) and iii) do not apply to template CR IRB 7.

75. In order to clarify whether the institution uses its own estimates for LGD and/or credit conversion factors, the following information shall be provided for each reported exposure class:

"NO" = in case the supervisory estimates of LGD and credit conversion factors are used (Foundation IRB)

"YES" = in case own estimates of LGD and credit conversion factors are used (Advanced IRB). This includes all retail portfolios.

In case an institution uses own estimates of LGDs to calculate risk weighted exposure amounts for a part of its IRB exposures as well as supervisory LGDs to calculate risk weighted exposure amounts for the other part of its IRB exposures, an CR IRB Total for F-IRB positions and one CR IRB Total for A-IRB positions has to be reported.

### 3.3.2. Breakdown of the CR IRB template

76. The CR IRB consists of seven templates. CR IRB 1 provides a general overview of IRB exposures and the different methods to calculate risk weighted exposure amounts as well as a breakdown of total exposures by exposure types. CR IRB 2 provides a breakdown of total exposures assigned to obligor grades or pools (exposures reported under row 0070 of CR IRB 1). CR IRB 3 provides all relevant parameters used for the calculation of credit risk capital requirements for IRB models. CR IRB 4 presents a flow statement explaining changes in risk weighted exposure amounts determined under the IRB approach for credit risk. CR IRB 5 provides information on the results of backtesting of PDs for the models reported. CR IRB 6 provides all relevant parameters used for the calculation of credit risk capital requirements under the slotting criteria for specialised lending. CR IRB 7 provides an overview of percentage of exposure value subject to SA or IRB approaches for each relevant exposure class. The templates CR IRB 1, CR IRB 2, CR IRB 3 and CR IRB 5 shall be reported separately for the following exposure and sub-exposure classes:

- 1) Total  
(The Total template must be reported for the Foundation IRB approach and, separately for the Advanced IRB approach.)
- 2) Central banks and central governments  
(~~point (a) of Article 147(2), point (a) of Regulation (EU) No 575/2013~~CRR)
- 3) Institutions  
(~~Article 147(2), point (b) point (b) of Article 147(2) of Regulation (EU) No 575/2013~~CRR)
- 4.1) Corporate – SME  
(~~Article 147(2), point (c) point (c) of Article 147(2) of Regulation (EU) No 575/2013~~CRR). For the purpose of classification to this sub-exposure class the

reporting entities shall use their internal definition of SME as applied in internal risk management processes.

- 4.2) Corporate – Specialised lending  
(Article 147(8) ~~of Regulation (EU) No 575/2013 CRR~~)
- 4.3) Corporate – Other  
(All exposures to corporates as referred to in ~~Article 147(2), point (c) point (e) of Article 147(2) of Regulation (EU) No 575/2013 CRR~~, not reported under 4.1 and 4.2).
- 5.1) Retail – Secured by immovable property SME  
(Retail exposures as referred to in ~~point (d) of Article 147(2), point (d) of Regulation (EU) No 575/2013 CRR~~ in conjunction with Article 154(3) ~~of that Regulation CRR~~ which are secured by immovable property). For the purpose of classification to this sub-exposure class the reporting entities shall use their internal definition of SME as applied in internal risk management processes.
- 5.2) Retail – Secured by immovable property non-SME  
(Retail exposures as referred to in ~~Article 147(2), point (d) point (d) of Article 147(2) of Regulation (EU) No 575/2013 CRR~~ which are secured by immovable property and not reported under 5.1).  
Under 5.1 and 5.2, retail exposures secured by immovable property shall be considered any retail exposures secured by immovable property recognised as collateral, regardless of the ratio of the value of collateral to the exposure or of the purpose of the loan.
- 5.3) Retail – Qualifying revolving  
(Retail exposures as referred to in ~~Article 147(2), point (d) point (d) of Article 147(2) of Regulation (EU) No 575/2013 CRR~~ in conjunction with Article 154(4) ~~of that Regulation CRR~~).
- 5.4) Retail – Other SME  
(Retail exposures as referred to in ~~Article 147(2), point (d) point (d) of Article 147(2) of Regulation (EU) No 575/2013 CRR~~ not reported under 5.1 and 5.3). For the purpose of classification to this sub-exposure class the reporting entities shall use their internal definition of SME as applied in internal risk management processes.
- 5.5) Retail – Other non – SME  
(Retail exposures as referred to in ~~Article 147(2), point (d) point (d) of Article 147(2) of Regulation (EU) No 575/2013 CRR~~ which were not reported under 5.2 and 5.3).

	<p>corresponding to an aggregation of obligor grades or pools (e.g. total exposures), the exposure weighted average of the PDs assigned to the obligor grades or pools included in the aggregation shall be provided. The exposure value (column 0110) shall be used for the calculation of the exposure-weighted average PD.</p> <p>For each individual grade or pool, the PD assigned to the specific obligor grade or pool shall be reported. All reported risk parameters shall be derived from the risk parameters used in the internal rating scale approved by the respective competent authority.</p> <p>It is neither intended nor desirable to have a supervisory master scale. If the reporting institution applies a unique rating scale or is able to report in accordance with an internal master scale, that scale shall be used.</p> <p>Otherwise, the different rating scales shall be merged and ordered in accordance with the following criteria: Obligor grades of the different rating scales shall be pooled and ordered from the lower PD assigned to each obligor grade to the higher. Where the institution uses a large number of grades or pools, a reduced number of grades or pools to be reported may be agreed with the competent authorities. The same applies for continuous rating scales: a reduced number of grades to be reported shall be agreed with the competent authorities.</p> <p>Institutions shall contact their competent authority in advance if they want to report a different number of grades in comparison with the internal number of grades.</p> <p>The last rating grade or grades shall be dedicated for defaulted exposures with PD of 100%.</p> <p>For the purposes of weighting the average PD, the exposure value reported in column 110 shall be used. The exposure weighted average PD shall be computed taking into account all exposures reported in a given row. In the row where only defaulted exposures are reported the average PD shall be of 100 %.</p>

EXPOSURE CLASSES	Institutions shall include the information in this template by exposure classes, in accordance with the breakdown of exposure classes included in the rows of the template.

3.4. Credit and counterparty credit risks and free deliveries: Information with geographical breakdown

85. All institutions shall submit information aggregated at a total level. Additionally, institutions fulfilling the threshold set in Article 5(5) of this Implementing Regulation shall submit information broken down by country regarding the domestic country as well as any non-domestic country. The threshold shall be considered only in relation to the CR GB 1 and CR GB 2 templates. Exposures to supranational organisations shall be assigned to the geographical area “other countries”.

86. The term ‘residence of the obligor’ refers to the country of incorporation of the obligor. This concept can be applied on an immediate-obligor basis and on an ultimate-risk basis. Hence, CRM techniques with substitution effects can change the allocation of an exposure to a country. Exposures to supranational organisations shall not be assigned to the country of residence of the institution but to the geographical area “Other countries”, irrespective of the exposure class where the exposure to supranational organisations is assigned.

87. Data regarding ‘original exposure pre-conversion factors’ shall be reported referring to the country of residence of the immediate obligor. Data regarding ‘exposure value’ and ‘Risk weighted exposure amounts’ shall be reported as of the country of residence of the ultimate obligor.

### 3.4.3. C 09.04 – Breakdown of credit exposures relevant for the calculation of the countercyclical buffer by country and institution-specific countercyclical buffer rate (CCB)

#### 3.4.3.1. General remarks

88. This template aims at receiving more information regarding the elements of the institution-specific countercyclical capital buffer. The information required refers to the own funds requirements determined in accordance with [Title II and Title IV of Part Three, Title II and Title IV of Regulation \(EU\) No 575/2013CRR](#) and the geographical location for credit exposures, securitisation exposures and trading book exposures relevant for the calculation of the institution-specific countercyclical capital buffer (CCB) in accordance with Article 140 [of Directive 2013/36/EUCRD](#) (relevant credit exposures).

Formatted: Font color: Auto

89. Information in template C 09.04 shall be reported for the ‘Total’ of relevant credit exposures across all jurisdictions where those exposures are located and individually for each of the jurisdictions in which relevant credit exposures are located. The total figures as well as the information of each jurisdiction shall be reported in a separate dimension.

90. The threshold set in Article 5(5) of this Implementing Regulation shall not apply for the reporting of this breakdown.

91. In order to determine the geographical location, the exposures shall be allocated on an immediate obligor basis as provided for in Commission Delegated Regulation (EU) No 1152/2014<sup>10</sup>. Therefore, CRM techniques shall not change the allocation of an exposure to its geographical location for the purpose of reporting information set out in this template.

<sup>10</sup> Commission Delegated Regulation (EU) No 1152/2014 of 4 June 2014 supplementing Directive 2013/36/EU of the European Parliament and of the Council with regard to regulatory technical standards on the identification of the geographical location of the relevant credit exposures for calculating institution-specific countercyclical capital buffer rates (OJ L 309, 30.10.2014, p. 5).

3.5. C 10.01 and C 10.02 – Equity exposures under the internal ratings based approach (CR EQU IRB 1 and CR EQU IRB 2)

3.5.1. General remarks

92. The CR EQU IRB template consists of two templates: CR EQU IRB 1 provides a general overview of IRB exposures of the equity exposure class and the different methods to calculate total risk exposure amounts. CR EQU IRB 2 provides a breakdown of total exposures assigned to obligor grades in the context of the PD/LGD approach. “CR EQU IRB” refers to both “CR EQU IRB 1” and “CR EQU IRB 2” templates, as applicable, in the following instructions.

93. The CR EQU IRB template provides information on the calculation of risk weighted exposure amounts for credit risk (~~point (a) of Article 92(3), point (a) of Regulation (EU) No 575/2013~~~~CRR~~) in accordance with ~~Chapter 3 of Title II of Part Three, Title II, Chapter 3 of Regulation (EU) No 575/2013~~~~CRR~~ for equity exposures as referred to in ~~point (e) of Article 147(2), point (e) of that Regulation~~~~CRR~~.

Formatted: Font color: Auto

Formatted: Font color: Auto

94. In accordance with Article 147(6) ~~of Regulation (EU) No 575/2013~~~~CRR~~, the following exposures shall be assigned to the equity exposure class:

Formatted: Font color: Auto

- (a) non-debt exposures conveying a subordinated, residual claim on the assets or income of the issuer;
- (b) debt exposures and other securities, partnerships, derivatives, or other vehicles, the economic substance of which is similar to the exposures specified in point (a).

95. Collective investment undertakings treated in accordance with the simple risk weight approach as referred to in Article 152 ~~of Regulation (EU) No 575/2013~~~~CRR~~ shall also be reported in the CR EQU IRB template.

Formatted: Font color: Auto

96. In accordance with Article 151(1) [of Regulation \(EU\) No 575/2013](#)~~CRR~~, institutions shall provide the CR EQU IRB template when applying one of the three approaches referred to in Article 155 [of Regulation \(EU\) No 575/2013](#)~~CRR~~:

- the Simple Risk Weight approach;
- the PD/LGD approach;
- the Internal Models approach.

Moreover, institutions applying the IRB approach shall also report in the CR EQU IRB template risk-weighted exposure amounts for those equity exposures which attract a fixed risk-weight treatment (without however being explicitly treated in accordance with the Simple Risk Weight approach or the (temporary or permanent) partial use of the Standardised approach for credit risk), e.g. equity exposures attracting a risk-weight of 250% in accordance with Article 48(4) [of Regulation \(EU\) No 575/2013](#)~~CRR~~, respectively a risk-weight of 370% in accordance with Article 471(2) [CRR of the Regulation](#).

97. The following equity claims shall not be reported in the CR EQU IRB template:

- Equity exposures in the trading book (where institutions are not exempted from calculating own funds requirements for trading book positions (Article 94 [of Regulation \(EU\) No 575/2013](#)~~CRR~~)).
- Equity exposures subject to the partial use of the Standardised approach (Article 150 [of Regulation \(EU\) No 575/2013](#)~~CRR~~), including:
  - Equity exposures grandfathered in accordance with Article 495(1) [of Regulation \(EU\) No 575/2013](#)~~CRR~~;
  - Equity exposures to entities the credit obligations of which are assigned a 0% risk weight under the Standardised approach, including those publicly sponsored entities where a 0% risk weight can be applied (~~point (g) of Article 150(1),~~ [point \(g\) of Regulation \(EU\) No 575/2013](#)~~CRR~~),
  - Equity exposures incurred under legislated programmes to promote specified sectors of the economy that provide significant subsidies for the investment to the institution and involve some form of government oversight and restrictions on the equity investments (~~Article 150(1), point (h) point (h) of Article 150(1) of~~ [Regulation \(EU\) No 575/2013](#)~~CRR~~),
  - Equity exposures to ancillary services undertakings the risk weighted exposure amounts of which may be calculated in accordance with the treatment of “other non credit-obligation assets” (Article 155(1) [of Regulation \(EU\) No 575/2013](#)~~CRR~~),
  - Equity claims deducted from own funds in accordance with Articles 46 and 48 [of Regulation \(EU\) No 575/2013](#)~~CRR~~.

### 3.6. C 11.00 – Settlement/Delivery Risk (CR SETT)

#### 3.6.1. General remarks

99. This template requests information on both trading and non-trading book transactions which are unsettled after their due delivery dates, and their corresponding own funds requirements for settlement risk as referred to in ~~point (c)(ii) of~~ Article 92(3), [point \(c\)\(ii\)](#) and Article 378 [of Regulation \(EU\) No 575/2013 CRR](#).

Formatted: Font color: Auto

100. Institutions shall report in the CR SETT template information on the settlement/delivery risk in connection with debt instruments, equities, foreign currencies and commodities held in their trading or non-trading book.

101. In accordance with Article 378 [of Regulation \(EU\) No 575/2013 CRR](#), repurchase transactions, securities or commodities lending and securities or commodities borrowing in connection with debt instruments, equities, foreign currencies and commodities are not subject to own funds requirements for settlement/delivery risk. Note however that, derivatives and long settlement transactions unsettled after their due delivery dates shall nevertheless be subject to own funds requirements for settlement/delivery risk as determined in Article 378 [of Regulation \(EU\) No 575/2013 CRR](#).

Formatted: Font color: Auto

Formatted: Font color: Auto

102. In case of unsettled transactions after the due delivery date, institutions shall calculate the price difference to which they are exposed. That is the difference be-

tween the agreed settlement price for the debt instrument, equity, foreign currency or commodity in question and its current market value, where the difference could involve a loss for the institution.

103. Institutions shall multiply that difference by the appropriate factor of [Table 1 of Article 378, Table 1 of Regulation \(EU\) No 575/2013 CRR](#) to determine the corresponding own funds requirements.

Formatted: Font color: Auto

104. In accordance with [point \(b\) of Article 92\(4\), point \(b\) of Regulation \(EU\) No 575/2013 CRR](#), the own funds requirements for settlement/delivery risk shall be multiplied by 12,5 to calculate the risk exposure amount.

Formatted: Font color: Auto

105. Note that own funds requirements for free deliveries as laid down in Article 379 [of Regulation \(EU\) No 575/2013 CRR](#) are not within the scope of the CR SETT template. Those own funds requirements shall be reported in the credit risk templates (CR SA, CR IRB).

3.7. C 13.01 - Credit Risk – Securitisations (CR SEC)

3.7.1. General remarks

106. Where institution acts as originator, the information in this template shall be required for all securitisations for which a significant risk transfer is recognised. Where the institution acts as investor, all exposures shall be reported.
107. The information to be reported shall be contingent on the role of the institution in the securitisation process. As such, specific reporting items shall be applicable for originators, sponsors and investors.
108. This template shall gather joint information on both traditional and synthetic securitisations held in the banking book.

3.7.2. Instructions concerning specific positions

Columns	
0010	<p><b><u>TOTAL AMOUNT OF SECURITISATION EXPOSURES ORIGINATED</u></b></p> <p>Originator institutions shall report the outstanding amount at the reporting date of all current securitisation exposures originated in the securitisation transaction, irrespective of who holds the positions. As such, on-balance sheet securitisation exposures (e.g. bonds, subordinated loans) as well as off-balance sheet exposures and derivatives (e.g. subordinated credit lines, liquidity facilities, interest rate swaps, credit default swaps, etc.) that have been originated in the securitisation shall be reported.</p> <p>In case of traditional securitisations where the originator does not hold any position, the originator shall not consider that securitisation in the reporting of this template. For that purpose, securitisation positions held by the originator shall include early amortisation provisions, as defined in Article 242(16) of Regulation (EU) No 575/2013 CRR, in a securitisation of revolving exposures.</p>

### 3.8. Detailed information on securitisations (SEC DETAILS)

#### 3.8.1. Scope of the SEC DETAILS template

111. These templates gather information on a transaction basis (versus the aggregate information reported in CR SEC, MKR SA SEC, MKR SA CTP, CA1 and CA2 templates) on all securitisations the reporting institution is involved in. The main features of each securitisation, such as the nature of the underlying pool and the own funds requirements shall be reported.

Field Code Changed

112. These template are to be reported for:

- a. Securitisations originated / sponsored by the reporting institution, including where it holds no position in the securitisation. In cases where institutions hold at least one position in the securitisation, regardless of whether there has been a significant risk transfer or not, institutions shall report information on all the positions they hold (either in the banking book or trading book). Positions held include those positions retained due to Article 6 of Regulation (EU) 2017/2402 and, where Article 43(6) of that Regulation applies, Article 405 [of Regulation \(EU\) No 575/2013CRR](#) in the version applicable on 31 December 2018.
- b. Securitisations, the ultimate underlying of which are financial liabilities originally issued by the reporting institution and (partially) acquired by a securitisation vehicle. That underlying could include covered bonds or other liabilities and shall be identified as such in column 0160.

Formatted: Font color: Auto

- c. Positions held in securitisations where the reporting institution is neither originator nor sponsor (i.e. investors and original lenders).

d. Template C 14.01 shall only be reported for those securitisation positions treated under the securitisations framework.

113. These templates shall be reported by consolidated groups and stand-alone institutions<sup>12</sup> located in the same country where they are subject to own funds requirements. In case of securitisations involving more than one entity of the same consolidated group, the entity-by-entity detail breakdown shall be provided.

114. Because of Article 5 of Regulation (EU) 2017/2402, which establishes that institutions investing in securitisation positions shall acquire a great deal of information on them in order to comply with due diligence requirements, the reporting scope of the template shall be applied to investors to a limited extent. In particular, they shall report columns 0010-0040; 0070-0110; 0160; 0190; 0290-0300; 0310-0470.

115. Institutions playing the role of original lenders (not performing also the role of originators or sponsors in the same securitisation) shall generally report the template to the same extent as investors.

### 3.8.2 Breakdown of the SEC DETAILS template

116. The SEC DETAILS consists of two templates. SEC DETAILS provides a general overview of the securitisations and SEC DETAILS 2 provides a breakdown of the same securitisations by approach applied.

117. Securitisation positions in the trading book shall only be reported in columns 0005-0020, 0420, 0430, 0431, 0432, 0440 and 0450-0470. For columns 0420, 0430 and 0440, institutions shall take into account the RW corresponding to the own funds requirement of the net position.

0130	<p><b><u>TOTAL AMOUNT OF SECURITISED EXPOSURES AT ORIGINATION DATE</u></b></p>

Formatted: Font color: Auto

	<p>This column gathers the amount (calculated on the basis of original exposures pre-conversion factors) of the securitised portfolio at the origination date.</p> <p>For securitisation schemes backed by open pools, the amount referring to the origination date of the first issuance of securities shall be reported. For traditional securitisations, no other assets of the securitisation pool shall be included. For multi-seller securitisation schemes (i.e. with more than one originator), only the amount corresponding to the reporting entity's contribution in the securitised portfolio shall be reported. For securitisations of liabilities, only the amounts issued by the reporting entity shall be reported.</p> <p>This information shall be reported even where the reporting entity does not hold any positions in the securitisation.</p>
0140-0225	<p><b><u>SECURITISED EXPOSURES</u></b></p> <p>Columns 0140 to 0225 request information on several features of the securitised portfolio by the reporting entity.</p>
0140	<p><b><u>TOTAL AMOUNT</u></b></p> <p>Institutions shall report the value of the securitised portfolio at reporting date, i.e. the outstanding amount of the securitised exposures. In the case of traditional securitisations, no other assets of the securitisation pool shall be included. In the case of multi-seller securitisation schemes (i.e. with more than one originator), only the amount corresponding to the reporting entity's contribution in the securitised portfolio shall be reported. In the case of securitisation schemes backed by closed pools (i.e. the portfolio of securitised assets cannot be enlarged after the origination date), the amount will progressively be reduced.</p> <p>This information shall be reported even where the reporting entity does not hold any positions in the securitisation.</p>
0150	<p><b><u>INSTITUTION'S SHARE (%)</u></b></p> <p>Institution's share (percentage with two decimals) at reporting date in the securitised portfolio. The figure to be reported in this column is, by default, 100%, except for multi-seller securitisation schemes. In that case, the reporting entity shall report its current contribution to the securitised portfolio (equivalent to column 0140 in relative terms).</p> <p>This information shall be reported even where the reporting entity does not hold any positions in the securitisation.</p>
0160	<p><b><u>TYPE</u></b></p> <p>This column gathers information on the type of assets ('Residential mortgages' to 'Other wholesale exposures') or liabilities ('Covered bonds' and 'Other liabilities') of the securitised portfolio. The institution shall report one of the following options, considering the highest EAD:</p>

	<p><b>Retail:</b> Residential mortgages; Credit card receivables; Consumer loans; Loans to SMEs (treated as retail); Other retail exposures.</p> <p><b>Wholesale:</b> Commercial mortgages; Leasing; Loans to corporates; Loans to SMEs (treated as corporates); Trade receivables; Other wholesale exposures.</p> <p><b>Liabilities:</b> Covered bonds; Other liabilities.</p> <p>Where the pool of securitised exposures is a mix of the types listed above, the institution shall indicate the most important type. In case of re-securitisations, the institution shall refer to the ultimate underlying pool of assets. Type ‘Other liabilities’ includes treasury bonds and credit linked notes.</p> <p>For securitisation schemes backed by closed pools the type cannot change between reporting dates.</p>
0171	<p><b><u>% OF IRB IN APPROACH APPLIED</u></b></p> <p>This column gathers information on the approach(es) that at the reporting date the institution would apply to the securitised exposures.</p> <p>Institutions shall report the percentage of the securitised exposures, measured by exposure value, to which the Internal Ratings Based Approach applies at the reporting date.</p> <p>This information shall be reported even where the reporting entity does not hold any positions in the securitisation. This column shall, however, not apply to securitisations of liabilities.</p>

0190	<p><b><u>COUNTRY</u></b></p> <p>Institutions shall report the code (ISO 3166-1 alpha-2) of the country of origin of the ultimate underlying of the transaction, i.e. the country of the immediate obligor of the original securitised exposures (look through). Where the pool of the securitisation consists of different countries, the institution shall indicate the most important country. Where no country exceeds a 20 % threshold based on the amount of assets/liabilities, then 'other countries' shall be reported.</p>
0201	<p><b><u>LGD (%)</u></b></p> <p>The exposure-weighted average loss-given-default (LGD) shall only be reported by those institutions applying the SEC-IRBA (and, therefore, reporting 95% or more in column 0170). The LGD is to be calculated as indicated in Article 259(5) <a href="#">of Regulation (EU) No 575/2013CRR</a>.</p> <p>This column shall not be reported in case of a securitisation of liabilities or where the own funds requirements are based on the securitised exposures (in case of a securitisation of assets).</p>
0202	<p><b><u>EL (%)</u></b></p> <p>The exposure-weighted average expected loss (EL) of the securitised assets shall only be reported by those institutions applying the SEC-IRBA (and, therefore, reporting 95% or more in column 0171). In the case of SA securitised assets, the EL reported shall be the specific credit risk adjustments as referred to in Article 111 <a href="#">of Regulation (EU) No 575/2013CRR</a>. ### 3.9. Counterparty Credit Risk

#### 3.9.1. Scope of the counterparty credit risk templates

119. The counterparty credit risk templates cover information on exposures subject to counterparty credit risk in application of ~~Chapters 4 and 6 of Title II of Part Three, Title II, Chapters 4 and 6 of Regulation (EU) No 575/2013~~CRR.

Formatted: Font color: Auto

120. The templates exclude the own funds requirements for CVA risk (~~point (d) of Article 92(3), point (d) and Title VI of Part Three, Title VI of Regulation (EU) No 575/2013~~CRR), which are reported in the CVA risk template.

Formatted: Font color: Auto

121. Counterparty credit risk exposures to central counterparties (~~Part Three, Title II, Chapter 4 and Section 9 of Chapter 6, Section 9 of of Title II of Part Three of Regulation (EU) No 575/2013~~CRR) should be included in the CCR figures, unless otherwise stated. However, default fund contributions calculated in accordance with Articles 307 to 310 CRR shall not be reported in the counterparty credit risk templates, with the exception of template C 34.10, in particular the corresponding rows. Generally, the risk weighted exposure amounts of default fund contributions are directly reported in template C 02.00 row 0460.

#### 3.9.2. C 34.01 - Size of the derivative business

##### 3.9.2.1. General remarks

122. In accordance with Article 273a ~~of Regulation (EU) No 575/2013~~CRR an institution may calculate the exposure value of its derivative positions in accordance with the method set out in ~~Section 4 or 5 of Chapter 6 of Title II of Part Three Title II, Chapter 6, Section 4 or 5 of Regulation (EU) No 575/2013~~CRR, provided that the size of its on- and off-balance-sheet derivative business is equal to or less than pre-defined thresholds, respectively. The corresponding assessment is to be carried out on a monthly basis using the data as of the last day of the month. This template provides the information on the compliance with those thresholds and, more generally, important information on the size of the derivative business.

Formatted: Font color: Auto

Formatted: Font color: Auto

123. Month 1, Month 2 and Month 3 refer to the first, second and last month, respectively, of the quarter that is being reported. Information shall be reported only for month-ends after the 28 June 2021.

### 3.9.7. C 34.06 – Top twenty counterparties

#### 3.9.7.1. General remarks

126. Institutions shall report information on the top 20 counterparties with whom they have the highest CCR exposures. The ranking shall be done using the CCR exposure values, as reported in column 0120 of this template, of all netting sets with the respective counterparties. Intra-group exposures or other exposures that give rise to counterparty credit risk but for which the institutions assign a risk weight of zero for the own funds requirements calculation, in accordance with Article 113(6) and 113(7) [of Regulation \(EU\) No 575/2013](#) ~~CRR~~, shall still be considered when determining the list of top 20 counterparties.

Formatted: Font color: Auto

127. Institutions applying the standardised approach (SA-CCR) or the Internal Model Method (IMM) for the calculation of CCR exposures following [Sections 3 and 6 of Chapter 6 of Title II of Part Three, Title II, Chapter 6, Sections 3 and 6 of Regulation \(EU\) No 575/2013](#) ~~CRR~~ shall report this template on a quarterly basis. Institutions applying the simplified standardised approach or the original exposure method (OEM) for the calculation of CCR exposures following [Sections 4 and 5 of Chapter 6 of Title II of Part Three, Title II, Chapter 6, Sections 4 and 5 of Regulation \(EU\) No 575/2013](#) ~~CRR~~ shall report this template on a semi-annual basis. 3.9.8. C 34.07 - IRB approach – CCR exposures by exposure class and PD scale

3.9.8.1. General remarks

128. This template shall be reported by institutions using either the advanced or the foundation IRB approach to compute risk weighted exposure amounts for all or part of their CCR exposures in accordance with Article 107 [of Regulation \(EU\) No 575/2013](#)~~CCR~~, irrespective of the CCR approach used to determine exposure values in accordance with ~~Chapters 4 and 6 of Title II of Part Three, Title II, Chapters 4 and 6 of Regulation (EU) No 575/2013~~~~CCR~~.

Formatted: Font color: Auto

Formatted: Font color: Auto

129. The template shall be reported separately for the total of all exposure classes as well as separately for each of the exposure classes listed in Article 147 [of Regulation \(EU\) No 575/2013](#)~~CCR~~. This template excludes exposures cleared through a CCP.

Formatted: Font color: Auto

130. In order to clarify whether the institution uses its own estimates for LGD and/or credit conversion factors the following information shall be provided for each reported exposure class:

"NO" = in case the supervisory estimates of LGD and credit conversion factors are used (Foundation IRB)

"YES" = in case own estimates of LGD and credit conversion factors are used (Advanced IRB)

4. Operational Risk Templates

4.1 C 16.00 – Operational Risk (OPR)

4.1.1 General Remarks

- 136. This template provides information on the calculation of own funds requirements in accordance with Articles 312 to 324 [of Regulation \(EU\) No 575/2013](#) ~~CRR~~ for Operational Risk under the Basic Indicator Approach (BIA), the Standardised Approach (TSA), the Alternative Standardised Approach (ASA) and the Advanced Measurement Approaches (AMA). An institution cannot apply TSA and ASA for the business lines retail banking and commercial banking at the same time at solo level.
  
- 137. Institutions using the BIA, TSA or ASA shall calculate their own funds requirement, based on the information at financial year-end. Where audited figures are not available, institutions may use business estimates. Where audited figures are used, institutions shall report the audited figures which are expected to remain unchanged. Deviations from this "unchanged" principle are possible, for instance if during that period the exceptional circumstances, such as recent acquisitions or disposals of entities or activities, are met.
  
- 138. Where an institution can justify its competent authority that – due to exceptional circumstances such as a merger or a disposal of entities or activities – using a three year average to calculating the relevant indicator would lead to a biased estimation for the own funds requirement for operational risk, the competent authority may permit the institution to modify the calculation in a way that would take into account such events. The competent authority may also on its own initiative require an institution to modify the calculation. An institution that has been in operation for less than three years may use forward looking business estimates in calculating the relevant indicator, provided that it starts using historical data as soon as those data are available.
  
- 139. By columns, this template presents information, for the three most recent years, on the amount of the relevant indicator of the banking activities subject to operational risk and on the amount of loans and advances (the latter only applicable in the case of ASA). Next, information on the amount of own funds requirement for operational risk is reported. Where applicable, it must be detailed which part of that amount is due to an allocation mechanism. Regarding AMA, memorandum items are added to present a detail of the effect of the expected loss, diversification and mitigation techniques on own funds requirement for operational risk.
  
- 140. By rows, information is presented by method of calculation of the operational risk own funds requirement detailing business lines for TSA and ASA.

Formatted: Font color: Auto

141. This template shall be submitted by all institutions subject to operational risk own funds requirement.

4.1.2. Instructions concerning specific positions

<b>Columns</b>	
0010-0030	<p><b><u>RELEVANT INDICATOR</u></b></p> <p>Institutions using the relevant indicator to calculate the own funds requirement for operational risk (BIA, TSA and ASA) shall report the relevant indicator for the respective years in columns 0010 to 0030. Moreover, in case of a combined use of different approaches as referred in Article 314 <a href="#">of Regulation (EU) No 575/2013</a><del>CRR</del>, institutions shall also report, for information purposes, relevant the indicator for the activities subject to AMA. The same shall apply for all other AMA banks.</p> <p>Hereafter, the term "relevant indicator" refers to "the sum of the elements" at the end of the financial year as referred to in <del>point 1 in Table 1 of Article 316</del>, <a href="#">Table 1, point 1, of Regulation (EU) No 575/2013</a><del>CRR</del>.</p> <p>Where the institution has less than 3 years of data on "relevant indicator" available, the available historical data (audited figures) shall be assigned by priority to the corresponding columns in the template. Where, for instance, historical data for only one year is available, those data shall be reported in column 0030. Where it seems reasonable, the forward looking estimates shall be included in column 0020 (estimate of next year) and column 0010 (estimate of year +2).</p> <p>Furthermore, where there are no historical data on "relevant indicator" available, the institution may use forward-looking business estimates.</p>
0040-0060	<p><b><u>LOANS AND ADVANCES (IN THE CASE OF ASA APPLICATION)</u></b></p> <p>These columns shall be used to report the amounts of the loans and advances, as referred to in <del>point (b) of Article 319(1)</del>, <a href="#">point (b) of Regulation (EU) No 575/2013</a><del>CRR</del>, for business lines "commercial banking" and "retail banking". Those amounts shall be used to calculate the alternative relevant indicator that leads to the own funds requirements corresponding to the activities subject to the alternative standard approach (<del>point (a) of Article 319(1)</del>, <a href="#">point (a) of Regulation (EU) No 575/2013</a><del>CRR</del>).</p> <p>For the "commercial banking" business line, securities held in the non-trading book shall also be included.</p>
0070	<p><b><u>OWN FUND REQUIREMENT</u></b></p> <p>The own fund requirement shall be calculated in accordance with the approaches used and in accordance with Articles 312 to 324 <a href="#">of Regulation (EU) No 575/2013</a><del>CRR</del>. The resulting amount shall be reported in column 0070.</p>

0080	<b><u>OF WHICH: DUE TO AN ALLOCATION MECHANISM</u></b>  Where a permission to use the AMA at consolidated level (Article 18(1) <a href="#">of Regulation (EU) No 575/2013</a> <del>CRR</del> ) has been granted in accordance with Article 312(2) <a href="#">of that Regulation</a> <del>CRR</del> , operational risk capital shall be allocated between the different entities of the group on the basis of the methodology applied by the institutions to consider diversification effects in the risk measurement system used by a EU parent credit institution and its subsidiaries or jointly by the subsidiaries of an EU parent financial holding company or an EU parent mixed financial holding company. The result of that allocation shall be reported in this column.
0090-0120	<b><u>AMA MEMORANDUM ITEMS TO BE REPORTED IF APPLICABLE</u></b>
0090	<b><u>OWN FUNDS REQUIREMENT BEFORE ALLEVIATION DUE TO EXPECTED LOSS, DIVERSIFICATION AND RISK MITIGATION TECHNIQUES</u></b>  The own funds requirement reported in column 090 is the one of column 070 but calculated before taking into account the alleviation effects due to expected loss, diversification and risk mitigation techniques (see below).
0100	<b><u>(-) ALLEVIATION OF OWN FUNDS REQUIREMENTS DUE TO THE EXPECTED LOSS CAPTURED IN BUSINESS PRACTICES</u></b>  In column 100, the alleviation of own funds requirements due to expected loss captured in internal business practices (as referred to in <del>point (a) of</del> Article 322(2), <a href="#">point (a) of Regulation (EU) No 575/2013</a> <del>CRR</del> ) shall reported.
0110	<b><u>(-) ALLEVIATION OF OWN FUNDS REQUIREMENTS DUE TO DIVERSIFICATION</u></b>  The diversification effect reported in this column shall be the difference between the sum of own funds requirements calculated separately for each operational risk class (i.e. a “perfect dependence” situation) and the diversified own funds requirement calculated by taking into account correlations and dependencies (i.e. assuming less than “perfect dependence” between the risk classes). The “perfect dependence” situation occurs in the “default case”, that is where the institution does not use explicit correlations structure between the risk classes, hence the AMA capital is calculated as the sum of the individual operational risk measures of the chosen risk classes. In that case, the correlation between the risk classes is assumed to be 100% and the value in the column has to be set to zero. Conversely, where the institution calculates an explicit correlations structure between risk classes, it has to include in this column the difference between the AMA capital as stemming from the “default case” and the AMA capital obtained

	after applying the correlations structure between the risk classes. The value reflects the “diversification capacity” of the AMA model, that is the ability of the model to capture the not simultaneous occurrence of severe operational risk loss events. In column 110, the amount by which the assumed correlation structure decreases the AMA capital relative to the assumption of 100% correlation has to be reported.
0120	<p><b><u>(-) ALLEVIATION OF OWN FUNDS REQUIREMENT DUE TO RISK MITIGATION TECHNIQUES (INSURANCE AND OTHER RISK TRANSFER MECHANISMS)</u></b></p> <p>The impact of insurance and other risk transfer mechanisms as referred to in Article 323 <a href="#">of Regulation (EU) No 575/2013</a><del>CRR</del> shall be reported in this column.</p>

0010	<p><b><u>BANKING ACTIVITIES SUBJECT TO BASIC INDICATOR APPROACH (BIA)</u></b></p> <p>This row shall present the amounts corresponding to activities subject to the BIA to calculate the own funds requirement for operational risk (Articles 315 and 316 <a href="#">of Regulation (EU) No 575/2013</a><del>CRR</del>).</p>
0020	<p><b><u>BANKING ACTIVITIES SUBJECT TO STANDARDISED (TSA)/ ALTERNATIVE STANDARDISED (ASA) APPROACHES</u></b></p> <p>The own funds requirement calculated in accordance with the TSA and ASA (Articles 317, 318 and 319 <a href="#">of Regulation (EU) No 575/2013</a><del>CRR</del>) shall be reported.</p>
0030-0100	<p><b><u>SUBJECT TO TSA</u></b></p> <p>Where the TSA is used, the relevant indicator for each respective year shall be distributed in rows 0030 to 0100 amongst the business lines referred to in <del>Table 2 of</del> Article 317, <a href="#">Table 2 of Regulation (EU) No 575/2013</a><del>CRR</del>. The mapping of activities into business lines shall follow the principles described in Article 318 <a href="#">of Regulation (EU) No 575/2013</a><del>CRR</del>.</p>
0110-0120	<p><b><u>SUBJECT TO ASA</u></b></p> <p>Institutions using the ASA (Article 319 <a href="#">of Regulation (EU) No 575/2013</a><del>CRR</del>) shall report for the respective years the relevant indicator separately for each business line in rows 0030 to 0050 and 0080 to 0100 and in rows 0110 and 0120 for business lines "commercial banking" and "retail banking".</p> <p>Rows 110 and 120 shall present the amount of the relevant indicator of activities subject to ASA, distinguishing between the amount corresponding to the business line “commercial banking” and the amounts corresponding to the business</p>

There can be amounts for the rows corresponding to “commercial banking” and “retail banking” under the TSA (rows 0060 and 0070) as well as under the ASA rows 0110 and 0120 (e.g. if a subsidiary is subject to TSA whereas the parent entity is subject to ASA).
0130	<p><b><u>BANKING ACTIVITIES SUBJECT TO ADVANCED MEASUREMENT APPROACHES AMA</u></b></p> <p>The relevant data for AMA institutions (Article 312(2) and Articles 321, 322 and 323 <a href="#">of Regulation (EU) No 575/2013</a><del>CRR</del>) shall be reported.</p> <p>Where different approaches are combined as indicated in Article 314 <a href="#">of Regulation (EU) No 575/2013</a><del>CRR</del>, information on relevant indicator for activities subject to AMA shall be reported. #### 4.2. Operational Risk: Detailed information on losses in the last year (OPR DETAILS)

##### 4.2.1. General Remarks

142. Template C 17.01 (OPR DETAILS 1) summarises the information on the gross losses and loss recoveries registered by an institution in the last year by event types and business lines. Template C 17.02 (OPR DETAILS 2) provides detailed information on the largest loss events in the most recent year.

143. Operational risk losses that are related to credit risk and are subject to own funds requirements for credit risk (boundary credit-related operational risk events) are neither considered in template C 17.01 nor template C 17.02.

144. In case of a combined use of different approaches for the calculation of own funds requirements for operational risk in accordance with Article 314 [of Regulation \(EU\) No 575/2013](#)~~CRR~~, losses and recoveries registered by an institution shall be reported in C 17.01 and C 17.02, irrespective of the approach applied to calculate own funds requirements.

Formatted: Font color: Auto

145. “Gross loss” means a loss - as referred to in ~~point (b) of~~ Article 322(3),- [point \(b\) of Regulation \(EU\) No 575/2013](#)~~CRR~~ - stemming from an operational risk event or loss event type before recoveries of any kind, without prejudice to “rapidly recovered loss events” as defined below.

Formatted: Font color: Auto

146. “Recovery” means an independent occurrence related to the original operational risk loss that is separate in time, in which funds or inflows of economic benefits are received from first or third parties, such as insurers or other parties. Recoveries are broken down into recoveries from insurance and other risk transfer mechanisms and direct recoveries.

147. “Rapidly recovered loss events” means operational risk events that lead to losses that are partly or fully recovered within five working days. In case of a rapidly recovered loss event, only the part of the loss that is not fully recovered (i.e. the

loss net of the partial rapid recovery) shall be included into the gross loss definition. As a consequence, loss events that lead to losses that are fully recovered within five working days shall not be included into the gross loss definition, and neither into the OPR DETAILS reporting.

148. "Date of accounting" means the date when a loss or reserve/provision was first recognised in the Profit and Loss statement, against an operational risk loss. Those date logically follow the "Date of occurrence" (i.e. the date when the operational risk event happened or first began) and the "Date of discovery" (i.e. the date on which the institution became aware of the operational risk event).

149. Losses caused by a common operational risk event or by multiple events linked to an initial operational risk event generating events or losses ('root-event') are grouped. The grouped events shall be considered and reported as one event, and thus the related gross loss amounts, respectively amounts of loss adjustments, shall be summed up.

150. The figures reported in June of the respective year shall be interim figures, while the final figures shall be reported in December. Therefore, the figures in June shall have a six-month reference period (i.e. from 1 January to 30 June of the calendar year) while the figures in December shall have a twelve-month reference period (i.e. from 1 January to 31 December of the calendar year). Both for data reported in June and December, "previous reporting reference periods" shall mean all reporting reference periods until and including the one ending at the preceding calendar year end.

#### 4.2.2. C 17.01: Operational risk losses and recoveries by business lines and loss event types in the last year (OPR DETAILS 1)

##### 4.2.2.1. General Remarks

151. In template C 17.01, the information shall be presented by distributing the losses and recoveries above internal thresholds amongst business lines (as listed in ~~Table 2 of Article 317, Table 2 of Regulation (EU) No 575/2013 CRR~~, including the additional business line "corporate items" referred to in ~~point (b) of Article 322(3), point (b) of Regulation (EU) No 575/2013 CRR~~) and loss event types (as referred to in in Article 324 ~~of Regulation (EU) No 575/2013 CRR~~). It is possible that the losses corresponding to one loss event are distributed amongst several business lines.

152. Columns present the different loss event types and the totals for each business line, together with a memorandum item that shows the lowest internal threshold applied in the data collection of losses, revealing within each business line the lowest and the highest threshold where there is more than one threshold.

153. Rows present the business lines, and within each business line, information on the number of loss events (new loss events), the gross loss amount (new loss events), the number of loss events subject to loss adjustments, the loss adjustments relating to previous reporting periods, the maximum single loss, the sum

Formatted: Font color: Auto

Formatted: Font color: Auto

Formatted: Font color: Auto

of the five largest losses and the total loss recoveries (direct loss recoveries as well as recoveries from insurance and other risk transfer mechanisms).

154. For the total business lines, data on the number of loss events and the gross loss amount shall also be reported for certain ranges based on set thresholds, that is 10,000, 20,000, 100,000, and 1,000,000. The thresholds are set in EUR and are included for comparability purposes of the reported losses among institutions. Those thresholds do therefore not necessarily relate to the minimum loss thresholds used for the internal loss data collection, to be reported in another section of the template.

#### 4.2.3. C 17.02: Operational risk: Detailed information on the largest loss events in the last year (OPR DETAILS 2)

##### 4.2.3.1. General Remarks

155. In template C 17.02, information on individual loss events shall be provided (one row per loss event).

156. The information reported in this template shall refer to "new loss events", i.e. operational risk events:

- (a) "accounted for the first time" within the reporting reference period; or
- (b) "accounted for the first time" within a previous reporting reference period, where the loss event was not included in any previous supervisory report, e.g. because it was identified as operational risk loss event only in the current reporting reference period or because the accumulated loss attributable to that loss event (i.e.

the original loss plus / minus all loss adjustments made in previous reporting reference periods) exceeded the internal data collection threshold only in the current reporting reference period.

157. Only loss events entailing a gross loss amount of 100,000 € or more shall be reported.

Subject to that threshold:

- (a) the largest event for each event type, provided that the institution has identified the event types for losses; and
- (b) at least the ten largest of the remaining events with or without identified event type by gross loss amount shall be included in the template.
- (c) Loss events shall be ranked based on the gross loss attributed to them.
- (d) A loss event shall only be considered once.

4.2.3.2. Instructions concerning specific positions

Columns	
0010	<p><b><u>Event ID</u></b></p> <p>The event ID is a row identifier and shall be unique for each row in the template. Where an internal ID is available, institutions shall provide the internal ID. Otherwise, the reported ID shall follow the numerical order 1, 2, 3, etc.</p>
0020	<p><b><u>Date of Accounting</u></b></p> <p>Date of accounting means the date where a loss or reserve / provision against an operational risk loss was first recognised in the Profit and Loss statement.</p>
0030	<p><b><u>Date of occurrence</u></b></p> <p>Date of occurrence shall be the date when the operational risk loss event happened or first began.</p>
0040	<p><b><u>Date of discovery</u></b></p> <p>Date of discovery shall be the date on which the institution became aware of the operational risk loss event.</p>

5. Market Risk Templates

158. These instructions refer to the templates for the reporting of the calculation of own funds requirements in accordance with the Standardised Approach for foreign exchange risk (MKR SA FX), commodities risk (MKR SA COM), interest rate risk (MKR SA TDI, MKR SA SEC, MKR SA CTP) and equity risk (MKR SA EQU). Additionally, instructions for the template for the reporting of the calculation of own funds requirements in accordance with the internal models approach (MKR IM) are included in this part.

Field Code Changed

159. The position risk on a traded debt instrument or equity (or debt or equity derivative) shall be divided into two components in order to calculate the capital required against it. The first shall be its specific-risk component — that is the risk of a price change in the instrument concerned due to factors related to its issuer or, in the case of a derivative, the issuer of the underlying instrument. The second component shall cover its general risk — that is the risk of a price change in the instrument due (in the case of a traded debt instrument or debt derivative) to a change in the level of interest rates or (in the case of an equity or equity derivative) to a broad equity- market movement unrelated to any specific attributes of individual securities. The general treatment of specific instruments and netting procedures can be found in Articles 326 to 333 [of Regulation \(EU\) No 575/2013](#)~~CRR~~.

5.1. C 18.00 – Market Risk: Standardised Approach for Position Risks in Traded Debt Instruments (MKR SA TDI)

5.1.1. General Remarks

160. This template captures the positions and the related own funds requirements for position risks on traded debt instruments under the Standardised Approach (~~point (a) of Article 325 (2),~~ [point \(a\) of Regulation \(EU\) No 575/2013](#)~~CRR~~). The different risks and methods available under [of Regulation \(EU\) No 575/2013](#)~~CRR~~ are considered by rows. The specific risk associated with exposures included in MKR SA SEC and MKR SA CTP has only to be reported in the Total template of the MKR SA TDI. The own funds requirements reported in those templates shall be transferred to cell {0325;0060} (securitisations) and {0330;0060} (CTP) respectively.

## 5.2. C 19.00 - MARKET RISK: STANDARDISED APPROACH FOR SPECIFIC RISK IN SECURITISATIONS (MKR SA SEC)

### 5.2.1. General Remarks

162. This template requests information on positions (all/net and long/short) and the related own funds requirements for the specific risk component of position risk in securitisations/ re-securitisations held in the trading book (not eligible for correlation trading portfolio) under the Standardised Approach.

Field Code Changed

163. The MKR SA SEC template presents the own funds requirement only for the specific risk of securitisation positions in accordance with Article 335 ~~of Regulation (EU) No 575/2013~~~~CRR~~ in connection with 337 ~~of that Regulation~~~~CRR~~. Where securitisation positions of the trading book are hedged by credit derivatives, Articles 346 and 347 ~~of Regulation (EU) No 575/2013~~~~CRR~~ apply. There is only one template for all positions of the trading book, irrespective of the approach institutions apply to determine the risk weight for each of the positions in accordance with ~~Chapter 5 of Title II of Part Three, Title II, Chapter 5 of Regulation (EU) No 575/2013~~~~CRR~~. The own funds requirements of the general risk of those positions shall be reported in the MKR SA TDI or the MKR IM template.

### 5.3. C 20.00 - MARKET RISK: STANDARDISED APPROACH FOR SPECIFIC RISK FOR POSITIONS ASSIGNED TO THE CORRELATION TRADING PORTFOLIO (MKR SA CTP)

#### 5.3.1. General Remarks

165. This template requests information on positions of the Correlation Trading Portfolio (CTP) (comprising securitisations, nth-to-default credit derivatives and other CTP positions included in accordance with Article 338(3) [of Regulation \(EU\) No 575/2013](#) ~~CRR~~) and the corresponding own funds requirements under the Standardised Approach.

Field Code Changed

Formatted: Font color: Auto

166. The MKR SA CTP template presents the own funds requirement only for the specific risk of positions assigned to the CTP in accordance with Article 335 [of](#)

Formatted: Font color: Auto

[Regulation \(EU\) No 575/2013](#)~~CRR~~ in conjunction with ~~paragraphs 2 and 3 of~~ Article 338, ~~paragraphs 2 and 3 of that Regulation~~~~CRR~~. If CTP-positions of the trading book are hedged by credit derivatives, Articles 346 and 347 ~~of Regulation (EU) No 575/2013~~~~CRR~~ apply. There is only one template for all CTP-positions of the trading book, irrespective of the approach institutions apply to determine the risk weight for each of the positions in accordance with ~~Chapter 5 of Title II of~~ Part Three, [Title II, Chapter 5 of Regulation \(EU\) No 575/2013](#)~~CRR~~. The own funds requirements for the general risk of these positions are reported in the MKR SA TDI or the MKR IM template.

Formatted: Font color: Auto

Formatted: Font color: Auto

Formatted: Font color: Auto

167. The template separates securitisation positions, n-th to default credit derivatives and other CTP-positions. Securitisation positions shall always be reported in rows 0030, 0060 or 0090 (depending on the role of the institution in the securitisation). N-th to default credit derivatives shall always be reported in row 0110. The "other CTP-positions" are positions that are neither securitisation positions nor n-th to default credit derivatives (see Article 338(3) [of Regulation \(EU\) No 575/2013](#)~~CRR~~), but they are explicitly "linked" to one of those two positions (because of the hedging intent).

Formatted: Font color: Auto

168. Positions which receive a risk weight of 1 250% can alternatively be deducted from CET1 (see ~~point (b) of~~ Article 244(1), ~~point (b) of~~ Article 245(1), ~~point (b) and~~ Article 253 [of Regulation \(EU\) No 575/2013](#)~~CRR~~). Where this is the case, those positions have to be reported in row 0460 of CA1.

5.7. C 24.00 - Market Risk Internal Model (MKR IM)

5.7.1. General Remarks

174. This template provides a breakdown of VaR and stressed VaR (sVaR) figures by the different market risks (debt, equity, FX, commodities) and other information relevant for the calculation of the own funds requirements.

Field Code Changed

175. Generally, it depends on the structure of the model of the institutions whether the figures for general and specific risk can be determined and reported separately or only as a total. The same holds true for the decomposition of the VaR /Stress-VaR into the risk categories (interest rate risk, equity risk, commodities risk and foreign exchange risk). An institution can refrain from reporting those decompositions if it proves that reporting those figures would be unduly burdensome.

6.2. C 32.02 - Prudent Valuation: Core Approach (PruVal 2)

6.2.1. General remarks

178. The purpose of this template is to provide information on the composition of the total AVA to be deducted from own funds under Articles 34 and 105 ~~of Regulation (EU) No 575/2013 CRR~~ alongside relevant information about the accounting valuation of the positions that give rise to the determination of AVAs.

179. This template shall be completed by all institutions that:

Field Code Changed

(a) are required to use the core approach because they exceed the threshold referred to in Article 4(1) of Delegated Regulation (EU) 2016/101, either on an individual basis or on a consolidated basis as set out in Article 4(3) of that Regulation; or

(b) have chosen to apply the core approach despite not exceeding the threshold.

180. For the purposes of this template, ‘upside uncertainty’ shall mean the following: As determined by Article 8(2) of Delegated Regulation (EU) 2016/101, AVAs are calculated as the difference between the fair value and a prudent valuation that is determined on the basis of a 90% confidence that institutions can exit the exposure at that point or better within the notional range of plausible values. The upside value or ‘upside uncertainty’ is the opposing point in the distribution of plausible values at which institutions are only 10% confident that they can exit the position at that point or better. The upside uncertainty shall be calculated and aggregated on the same basis as the total AVA but substituting a 10% level of certainty for the 90% used when determining the total AVA.

	Adjustment applied in the institution's fair value to adjust for the fact that the position level valuations do not reflect an exit price for the position or portfolio, in particular where such valuations are calibrated to a mid-market price, and thus that can be identified as addressing the same source of valuation uncertainty as the close-out costs AVA.
0190	<p><b><u>MODEL RISK</u></b></p> <p>Adjustment applied in the institution's fair value to reflect market or product factors that are not captured by the model used to calculate daily position values and risks ('valuation model') or to reflect an appropriate level of prudence given the uncertainty arising from the existence of a range of alternative valid models and model calibrations and thus that can be identified as addressing the same source of valuation uncertainty as the model risk AVA.</p>
0200	<p><b><u>CONCENTRATED POSITIONS</u></b></p> <p>Adjustment applied in the institution's fair value to reflect the fact that the aggregate position held by the institution is larger than normal traded volume or larger than the position sizes on which observable quotes or trades that are used to calibrate the price or inputs used by the valuation model are based and thus can be identified as addressing the same source of valuation uncertainty as the concentrated positions AVA.</p>
0210	<p><b><u>UNEARNED CREDIT SPREADS</u></b></p> <p>Adjustment applied in the institution's fair value to cover expected losses due to counterparty default on derivative positions (i.e. total Credit Valuation Adjustment 'CVA' at institution level).</p>
0220	<p><b><u>INVESTING AND FUNDING COSTS</u></b></p> <p>Adjustment applied in the institution's fair value to compensate where valuation models do not fully reflect the funding cost that market participants would factor into the exit price for a position or portfolio (i.e. total Funding Valuation Adjustment at institution level where an institution computes such adjustment, or alternatively, equivalent adjustment).</p>
0230	<p><b><u>FUTURE ADMINISTRATION COSTS</u></b></p> <p>Adjustment applied in the institution's fair value to reflect administrative costs that are incurred by the portfolio or position but are not reflected in the valuation model or the prices used to calibrate inputs to that model, and thus that can be identified as addressing the same source of valuation uncertainty as the Future administrative costs AVA.</p>
0240	<p><b><u>EARLY TERMINATION</u></b></p> <p>Adjustments applied in the institution's fair value to reflect contractual or non-contractual early termination expectations that are not reflected in the valuation model and thus can be identified as addressing the same source of valuation uncertainty as the Early termination AVA.</p>

0250	<p><b><u>OPERATIONAL RISK</u></b></p> <p>Adjustments applied in the institution's fair value to reflect the risk premium that market participants would charge to compensate for operational risks arising from hedging, administration and settlement of contracts in the portfolio, and thus can be identified as addressing the same source of valuation uncertainty as the operational risk AVA.</p>
0260	<p><b><u>DAY 1 P&amp;L</u></b></p> <p>Adjustments to reflect instances where the valuation model plus all other relevant fair value adjustments applicable to a position or portfolio did not reflect the price paid or received at first day recognition, i.e. the deferral of day one gains and losses (IFRS 9.B5.1.2.A).</p>

6.3. C 32.03 - Prudent Valuation: Model Risk AVA (PruVal 3)

6.3.1. General remarks

- 181. This template is to be completed only by institutions that exceed the threshold referred to in Article 4(1) of Delegated Regulation (EU) 2016/101 at their level. Institutions that are part of a group breaching the threshold on a consolidated basis are required to report this template only where they also exceed the threshold at their level.
- 182. This template shall be used to report details of the top 20 individual model risk AVAs in terms of AVA amount that contribute to the total category level model risk AVA computed in accordance with Article 11 of Delegated Regulation (EU) 2016/101. That information corresponds to the information reported in column 0050 of template C 32.02.
- 183. The top 20 individual model risk AVAs, and corresponding product information, shall be reported in decreasing order starting from the largest individual model risk AVAs.
- 184. Products corresponding to those top individual model risk AVAs shall be reported using the product inventory required by ~~point (a) of Article 19(3),~~ [point \(a\)](#) of Delegated Regulation (EU) 2016/101.
- 185. Where products are sufficiently homogenous with respect to the valuation model and the model risk AVA, they shall be merged and shown on one line for the purpose of maximising coverage of this template in respect of the total category level Model Risk AVA of the institution.

## 7. C 33.00 - Exposures to General governments (GOV)

### 7.1. General remarks

191. The information for the purpose of template C 33.00 shall cover all exposures to 'General governments' as referred to in point (b) of paragraph 42 of Annex V to this Implementing Regulation.
192. Where the exposures to 'General governments' are subject to own funds requirements in accordance with ~~Title II of Part Three~~, [Title II of Regulation \(EU\) No 575/2013 CRR](#), exposures to 'General governments' are included in different exposure classes in accordance with Article 112 and Article [of that Regulation 147 CRR](#), as specified by the instructions for the completion of template C 07.00, C 08.01 and C 08.02.
193. Table 2 (Standardised Approach) and Table 3 (IRB Approach), included in Part 3 of Annex V to this Implementing Regulation, shall be observed for the mapping of exposure classes used to calculate capital requirements under [of Regulation \(EU\) No 575/2013 CRR](#) to counterparty sector 'General governments'.

194. Information shall be reported for the total aggregate exposures (meaning the sum of all countries in which the bank has sovereign exposures) and for each country on the basis of the residence of the counterparty on an immediate borrower basis.

Field Code Changed

195. The allocation of exposures to exposure classes or jurisdictions shall be made without considering credit mitigation techniques and in particular without considering substitution effects. However, the calculation of exposure values and risk weighted exposure amounts for each exposure class and each jurisdiction shall include the incidence of credit risk mitigation techniques, including substitution effects.

Field Code Changed

196. The reporting of information on exposures to ‘General governments’ by jurisdiction of residence of the immediate counterparty other than the domestic jurisdiction of the reporting institution is subject to the thresholds laid down in Article 6(3) of this Implementing Regulation.

### 7.2. Scope of the template on exposures to “General governments”

197. The scope of the GOV template covers on-balance sheet, off-balance sheet and derivatives direct exposures to “General governments” in the banking and trading book. In addition, a memorandum item on indirect exposures in the form of credit derivatives sold on general government exposures is also requested.

Field Code Changed

198. An exposure is a direct exposure when the immediate counterparty is an entity that is a ‘General government’ as referred to in point (b) of paragraph 42 of Annex V to this Implementing Regulation.

Field Code Changed

199. The template is divided in two sections. The first one is based on a breakdown of exposures by risk, regulatory approach and exposure classes whereas a second one is based on a breakdown by residual maturity

8. NPE Loss Coverage (NPE LC)

8.1. General remarks

200. The NPE loss coverage templates contain information about non-performing exposures (NPEs) for the purposes of calculating the minimum loss coverage requirement for non-performing exposures as specified in Articles 47a, 47b and 47c of Regulation (EU) No 575/2013 CRR.

Field Code Changed

201. The block of templates consists of a set of three templates:

Field Code Changed

a) The calculation of deductions for NPEs (C 35.01): this is an overview template indicating the applicable amount of insufficient coverage, calculated as the difference between the total minimum coverage requirements for NPEs and the total provisions and adjustments or deductions already made. The template covers both the non-performing exposures where forbearance measure has not been granted, and non-performing forborne exposures.

b) Minimum coverage requirements and exposure values of non-performing exposures, excluding forborne exposures that fall under Article 47c(6) of Regulation (EU) No 575/2013 CRR (C 35.02): the template calculates the total minimum coverage requirements for non-performing exposures that are not non-performing forborne exposures that fall under Article 47c(6) of Regulation (EU) No 575/2013 CRR, indicating the factors to be applied on the exposure values for the purposes of this calculation given whether the exposure is secured or unsecured and given the time since the exposure became non-performing.

c) Minimum coverage requirements and exposure values of non-performing forborne exposures that fall under Article 47c(6) of Regulation (EU) No 575/2013 CRR (C 35.03): the template calculates the total minimum coverage requirements for non-

performing forborne exposures that fall under Article 47c(6) [of Regulation \(EU\) No 575/2013](#)~~CRR~~, indicating the factors to be applied on the exposure values for the purposes of this calculation given whether the exposure is secured or unsecured and given the time since the exposure became non-performing.

202. The the minimum loss coverage requirement for non-performing exposures applies to (i) exposures, originated on and after 26 April 2019, that become non-performing, and (ii) exposures originated before 26 April 2019 when they are modified after that date in a way that increases their exposure value to the obligor (Article 469a [of Regulation \(EU\) No 575/2013](#)~~CRR~~), that become non-performing.

203. Institutions shall calculate the deductions for NPEs in accordance with ~~points (a) and (b) of~~ Article 47c(1), [points \(a\) and \(b\) of Regulation \(EU\) No 575/2013](#)~~CRR~~,, including the calculation of minimum coverage requirements and total provisions and adjustments or deductions, at individual exposure level ('transaction based') and not at debtor or portfolio levels.

Formatted: Font color: Auto

204. For the purposes of calculating the deductions for NPEs, institutions shall differentiate between the unsecured and secured part of a NPE in accordance with Article 47c(1) ~~CRR~~, [of Regulation \(EU\) No 575/2013](#). To this end, institutions shall report exposure values and minimum coverage requirements separately for the unsecured part of NPEs and for the secured part of NPEs.

205. For the purposes of mapping of relevant applicable factors and calculating minimum coverage requirements, institutions shall classify the secured part of NPEs depending on the type of credit protection in accordance with Article 47c(3) [of Regulation \(EU\) No 575/2013](#)~~CRR~~ as follows: (i) "secured by immovable property or residential loan guaranteed by an eligible protection provider as referred to in Art. 201", (ii) "secured by other funded or unfunded credit protection" or (iii) "guaranteed or insured by an official export credit agency",. When a non-performing exposure is secured by more than one type of credit protection, its exposure value shall be allocated according to the quality of the credit protection, starting from the one with the best quality.
